

These helpful tips will keep your suite in top condition

Carpets:

-  Place a floor mat inside suite door
-  Vacuum carpets on a weekly basis
-  When a spill happens, use cold water, then a dry cloth. Or, use a spot remover immediately if needed

Moisture:

-  Excess moisture causes paint peeling; wall stains as well as mildew and mould.
-  Use exhaust fans in kitchen when cooking
-  Use bathroom fans when showering and crack a window open.
-  Let fans run for another 20 minutes after as well
-  Wipe up moisture from window tracks and sills to prevent mildew build up

Tub/Shower:

-  Please clean tub and enclosure regularly
-  Check the floor around the tub and toilet for moisture to prevent damage and mildew or mould.
-  If there are areas in the tub/shower area that need silicone or caulking, please report the problem to us right away and we will repair the area to prevent further damage.

Walls:

-  Wash marks off when they happen

Oven:

-  Place a drip pan or aluminum foil on the bottom of the oven. If the oven is used often please clean every 1-2 months and this will make clean-up later much easier.

Dryer:

-  Clean dryer lint trap after every use.

Thank You!
